

Dark Web Monitoring

We'll monitor your personal information on the dark web like email addresses, bank account numbers, credit card numbers, phone numbers, drivers license number and notify you should it be found,

Social Media Monitoring

It monitors your accounts on the most popular social media sites and notifies you of suspicious activity, like changes to your account settings, unusual logins and risky links in your posts.

Device Security

Real-time protection for your Windows™ PC, Mac® or Android™ devices against ransomware, viruses, spyware, malware, & other online threats. Monitors and helps block unauthorised traffic.

SMS Security

Helps to identify text messages with unsafe links, notifying you so you don't put your personal information at risk. It works seamlessly on Android and iOS devices.

Report Card

Get a summary of all the activities that we've done to help protect you, your device and the information stored on it in the last 30 days.

Password Manager

Gives you tools to generate and manage your passwords—more securely and in one place.
